

Matrixneedling™
Advanced Microneedling Products

SCAN ME

We Make Skin Care Work.

Conventional cosmetics do not penetrate the deeper layers of the skin. Through microneedling, we overcome the skin's natural protective barrier and deliver active ingredients in their purest form precisely to where they are needed. With pioneering microneedling concepts, we enable precise, safe, and reproducible treatments for visible and lasting results on every skin type. For skin care that truly works.

Our Signature Treatment.

Matrixneedling™

Matrixneedling™ is microneedling—only taken further. Our protocol and the composition of our products are based on more than a decade of development and over one million treatments performed. The goal is to achieve results that are more effective, sustainable, and individually customizable, while keeping the treatment experience gentle for patients. The result is a clearly structured 8-step protocol that is effective, safe, indication-based, and completely reproducible—from cleanser to aftercare. We call it Matrixneedling™.

Microneedling

- › Non-surgical
- › Effective
- › Regenerative
- › Safe
- › Low-risk
- › Cost-effective

Matrixneedling™

Matrixneedling™ combines all the benefits of traditional microneedling and additionally offers extra strengths.

- + Customizable
- + Systemic
- + Innovative
- + Simple
- + Reproducible
- + Medically certified

Protocol

1 Cleansing

Light cleansing foam gently and thoroughly removes sebum, makeup, and impurities. Strengthens the skin barrier before treatment and acts preventively against skin irritations.

2 Peeling

Enzymatic peeling with fruit extracts and bromelain: gently removes dead skin cells and evens out the skin texture for barrier-free skin penetration.

3 Serum

Wide selection of serums, gels, or silk balls with high-tech active ingredients that can address virtually any skin concern. Cruelty-free and of the purest quality.

4 Needling

Innovative, technologically advanced needling pens for precise, safe, and efficient professional use. From entry-level models to medical-grade versions.

5 Hydration

Innovative 3-level complex combines hydration, regeneration, and age protection in a single product. Provides moisture, protects, and soothes the skin immediately. A moment of well-being.

6 Repair

Strengthens the skin barrier, provides intensive care, and, through its occlusive properties, prevents an increase in transepidermal water loss, which can cause dryness after treatment.

7 UV Protect

Exceptionally gentle sunscreen that provides excellent protection and reliably prevents unwanted side effects. Hygienic application via pump dispenser.

8 Daily Care

Innovative, two-step aftercare concept.
Step 1: Occlusive function with basic care.
Step 2: Indication-based ingredients with collagen booster.

Hairline

Forehead and glabellar lines

Periorbital area

Periocular area

Preauricular area

Nasolabial fold

Lip area

Facial contours

Neck area

Hands / Hand area

Décolleté

Treatment Variety.

The face, neck, hands, and décolleté are central treatment areas in aesthetic applications. Typical indications include wrinkles, loss of elasticity, pigmentation disorders, acne, scars, uneven skin tone, and UV-induced skin damage.

The D/A microneedling serums enable a wide range of treatment options—from hydration and anti-aging to regeneration, brightening, and scar care—and can be flexibly tailored to skin type, treatment area, and treatment goal.

Standardized formulations, sterile quality, and clearly defined protocols ensure safe applications, consistent results, and reproducible treatment success.

The variety of possible applications supports individualized treatment planning based on patient needs.

Abdomen

Hips and waist area

Buttocks

Thighs

Firm, Smooth, Revitalise.

The abdomen, hips, and thighs are prone to cellulite, stretch marks after pregnancy, and skin laxity; scars can also occur in these areas. The D/A microneedling serums provide targeted solutions for improving texture, tissue regeneration, firming, and scar treatment—completely non-surgical. Clinical studies show that scars can become up to 75% less visible after multiple microneedling treatments. Indication-specific formulations, including Cellulite Reversal and Stretch & Scar Reversal, allow the full potential to be realized.

Cleansing

Cleanser Essential Solution

Gently and thoroughly cleanses the skin before microneedling.

- » Gentle cleansing foam for all skin types
- » Reduces TEWL after microneedling
- » Acts preventively against skin irritations

Enzymatic Peeling Essential Solution

Gently removes dead skin cells and evens out the skin texture.

- » Thorough but gentle peeling
- » With encapsulated papain and bromelain
- » Low stress on the skin barrier

Peeling

Our Enzymatic Peeling combines an aromatic treatment experience with effective skin preparation for microneedling. Biopolymer-encapsulated extracts from papaya and pineapple gently remove dead skin cells and promote cell regeneration—without aggressive acids or mechanical particles. The enzymes bromelain and papain provide controlled activity for an even peeling effect while preserving epidermal integrity. Encapsulated active ingredients enhance the peeling's stability and effectiveness.

The result is smooth, even skin texture, providing the ideal base for microneedling treatments. Needle penetration occurs barrier-free, and serum can be evenly delivered. The peeling can also be used independently to refine skin texture and support regeneration.

Gentle Exfoliation.

Encapsulation

Bromelain and papain in encapsulated form.

Clean

Deliberately free of synthetic ingredients.

Vegan

Contains no animal-derived ingredients.

Cruelty-free

We never test our products on animals.

Hyaluron Booster Sterile Serum

Absolute base serum with stabilized hyaluronic acid at a high concentration of 3.5%.

- » Intensive hydration and revitalization
- » Combination of different molecular sizes
- » Multiple times more effective than conventional cosmetics

We develop and produce one of the most extensive lines of indication-based microneedling serums on the market. Each formulation is specifically designed for treatment and is based on carefully selected, premium-quality active ingredients. Our serums stand for pharmaceutical-grade purity, reliable efficacy, and reproducible treatment results. With their practice-oriented composition and competitive pricing, they have become an integral part of modern professional microneedling concepts and are indispensable in clinics and studios. More than 20,000 customers from dermatology, cosmetology, and healthcare appreciate this—96% of them would recommend our products to friends or colleagues.

Safe. Versatile. Effective.

Packaging

Pharmaceutical-grade, multi-use microneedle ampoules.

Clean

Deliberately free of synthetic ingredients and unnecessary fillers.

Results

Formulation for visible results after just a few applications.

Cruelty-free

We never test our products on animals.

Anti-Aging Intense Sterile Serum

Reduces lines and deep wrinkles, leaving the skin looking more youthful.

Argireline + Peptide Booster Sterile Serum

Targets expression lines, forehead wrinkles, and all types of perioral wrinkles.

Exosome Booster Sterile Serum

Delivers active exosomes for improved skin condition.

Retinol + Vitamin C Booster Sterile Serum

Rejuvenates skin, combats photoaging, and minimizes large pores.

Stretch & Scar Reversal Sterile Serum

Active reduction and improvement of scars and stretch marks.

Salmon DNA Sterile Serum

Polynucleotides derived from salmon DNA for targeted skin rejuvenation.

Eye Contour Reversal Sterile Serum

Specifically effective for periorbital wrinkles, eye bags, and dark circles.

EGF Cell Booster Sterile Serum

Works effectively for skin rejuvenation and intensive revitalization.

Acne & Oily Skin Reversal Sterile Serum

Regulates sebum production and reduces acne-causing bacteria.

Glow Booster Sterile Serum

Evens out skin tone and gives the face a radiant, healthy glow.

Cellulite Reversal Sterile Serum

Firms the skin and reduces cellulite as well as water retention.

Lipolysis Booster Sterile Serum

Reduces localized fat deposits through targeted lipolytic action on the skin.

Hair Growth Booster Sterile Serum

Reduces hair loss and stimulates new hair growth. Also suitable for the beard.

Man Skin Essentials Sterile Serum

Anti-aging serum specifically tailored to male skin needs.

Lip Booster Sterile Serum

For enhancing lip color and smoothing fine lip lines.

Skin Tone Control Sterile Serum

Treats melasma-related skin spots and enables overall skin tone correction.

Gels

Our microneedling gels come in ready-to-use prefilled syringes with highly concentrated active ingredients. Their viscous formulation serves as a glide medium between the skin and the microneedling device. Different variants allow for maximum treatment success.

Hyaluron Gel

60 mg

Collagen Gel

210 mg

Adenosine Gel

30 mg

Gel Mixed Bundle

Microneedling

A total of 3 viscous gels for the microneedling treatment.

- » Hyaluron Gel, 60 mg
- » Collagen Gel, 210 mg
- » Adenosine Gel, 30 mg

Eyebrow Vitamins

Serum

Microneedling serum with vitamins and peptides for eyebrow stimulation.

Cannula Set

Collect + Apply

Our innovation for precise extraction and targeted application of serums and liquids to the treatment area.

- » Set with syringe, extraction cannula, and application cannula
- » Perfect for serum, acids, PRP, or pigments
- » Safe thanks to blunt tip and L-shaped cannula design

Sterile Set

No more sourcing costly individual products. The first set that combines all products sterilely in one kit, each separately capped for protection. Ready to use.

Universally Applicable

Indispensable and ideal for serums, PRP, or other liquids. The 5 ml syringe features a Luer-lock connector for secure needle attachment and enables easy and precise application of even highly viscous serums.

Maximum Handling

The plunger with a double-sealing ring allows smooth drawing and precise dosing of even very small amounts. The highly transparent cylinder with clear black graduations (in ml) ensures optimal, quick, and effortless readability and is also smudge-resistant.

Easy Extraction

The 40 mm long extraction cannula is ideal for sterile and complete retrieval of liquids, pasty materials, and gels, even from larger ampoules safely and efficiently.

Maximum Safety

The curved, blunt L-cannula minimizes the risk of injury and irritation to the skin surface. The transition to the cannula is manually sealed to prevent leaks, and together with the low dead space, it minimizes material loss.

Application Reimagined.

The Cannula Set is a multi-component treatment kit designed to help professionals focus on the procedure. With the 5 ml syringe, an extraction cannula, and the curved L-cannula, serums, PRP, fruit acids, or BB Glow pigments can be quickly and efficiently drawn and applied. The set saves preparation time and enables precise, comfortable application on the face and body—ideal for the professional practice environment. A true gamechanger in aesthetics.

Balancing Silk Ball

Mannitol and collagen balance oily skin types and help stabilize sebum production.

Firming Silk Ball

Peptides, hyaluronic acid, and collagen help firm the skin in the treatment area.

Pures.

SCAN ME

Our Silk Balls are sterile, lyophilized silk protein threads combined with high-quality collagen and indication-based active ingredients. They can be dissolved in distilled water or compatible serums, providing a true collagen boost.

Brightening Silk Ball

Lithospermum and collagen specifically brighten the affected skin areas.

Collagen Silk Ball

Structural proteins and collagen increase the viscosity of the preparation.

Defining Silk Ball

Peptides and collagen visibly reduce signs of skin aging.

Flawless Silk Ball

Niacinamide, astaxanthin, and collagen reduce pigmentation and skin spots.

Moisturizing Silk Ball

Troloxerutin, hyaluronic acid, and collagen give the complexion a fresh, radiant look.

Pures Mixed Bundle

A total of seven sterile Silk Balls are included in a practical and convenient set.

Needling

Dermaroller

192 Pins / Ø 0.18 mm

Needle lengths: 0.25 / 0.5 / 0.75 / 1.0 / 1.5 mm

Pioneer of precision, widely imitated yet still unmatched in quality and performance. Germany's best-selling dermaroller.

- » Real needles – not stamped parts
- » Minimal needle diameter – minimal skin trauma

SCAN ME

Trauma Without the Drama.

192 Needles

The optimal number of needles consistently shows the best results in empirical studies.

Material & Handle

Ergonomic handle with a non-slip surface and optimal roller width for comfortable, controlled use.

Hygiene

Germ-resistant material with a chromium oxide surface, resistant to disinfectants.

Minimal Downtime

A needle diameter of only 0.18 mm prevents trauma and micro-injuries.

Available Needle Lengths

Our dermarollers are available in all sizes from 0.25 mm to 1.5 mm.

Disinfectant Spray

Essential Solution

Fast-acting spray for disinfecting the dermaroller before and after microneedling.

Dermastamp Kit

12 Pins / Ø 0.30 mm

The manual dermastamp with 5 sterile needle modules is perfect for smaller treatment areas during microneedling.

Begin your journey into modern microneedling today with our free, comprehensive online course.

NeedlingPen

Aesthetic CONTROL

Our ultimate solution for professional users with innovative features.

SCAN ME

The NeedlingPen Aesthetic CONTROL combines power, precision, and durability in a device designed for daily use in clinics, beauty studios, spas, and wellness hotels. With an electrically adjustable needle length from 0.25 mm to 2.5 mm, up to 18,000 strokes per minute, and six power levels, treatments can be perfectly adapted to skin type and desired results. The intuitive LED display allows users to monitor and control all parameters comfortably at any time. The Wave-Shape Edge design ensures smooth

gliding over the skin, minimizes injuries, and optimizes active ingredient absorption. Three needle modules are available for different applications, while the Advanced+ package is designed for intensive continuous use. The Dock&Load base station enables easy charging of replacement batteries, and the robust aluminum case ensures safe transport. The original NeedlingPen Aesthetic CONTROL is protected by the German Patent and Trademark Office and sets professional standards.

Reliable Performance.

Advanced+ Power

With 18,000 strokes per minute and long battery life, maximum performance is available.

Anti-Backflow

Protection against liquids and cross-contamination through an integrated anti-backflow system.

Push Select

More flexibility during treatments with an electrically adjustable needle length of up to 2.5 mm.

Material & Design

High-quality construction from solid aluminum in a perfectly ergonomic and stylish design.

Dock&Load

Charging function and battery status notification conveniently integrated into the base station.

Wave-Shape Edge

Allows smooth, effortless gliding over the skin without scratching or drawing in any fluids.

NeedlingPen

Infinity CONTROL

The best-selling NeedlingPen, favored by thousands of professional users.

- » Finest needles for minimal trauma
- » Integrated anti-backflow system
- » Adjustable from 0.1 to 1.5 mm

Reliable Performance

With 16,000 strokes per minute and long battery life, maximum performance is ensured.

Anti-Backflow

Protection against liquids and cross-contamination with an integrated anti-backflow system.

Needle Adjustment

Greater flexibility during treatment with electrically adjustable needle length up to 1.5 mm.

Aluminum Housing

Extremely robust and long-lasting housing made from high-quality aluminum.

Smart-Memory

Maintains the speed level settings at the user's preferred level.

Onlineguide

Our digital video guide leads you step by step through the treatment.

Lightweight, handy, and ideal for professional users, this highly reliable pen is used in thousands of studios worldwide for BB Glow, microneedling, and collagen stimulation. Three needle modules, five power levels, and an LED display allow for precise treatments. Available in two striking colors, the Infinity CONTROL is not only effective but also a visual highlight in any practice.

SCAN ME

Anti-Backflow Needle Cartridges.

Our needle cartridges offer maximum flexibility and precision for every treatment. They can be individually adjusted to different skin types, indications, and treatment goals. The stable spring mechanism ensures precise up-and-down movements, while the Easy-Protect cap protects the cartridge from mechanical and bacterial stress. An integrated anti-backflow system prevents cross-contamination from blood, plasma, or serum and also protects

against corrosion damage in the motor area. Mixed bundles with 30 cartridges provide additional cost benefits for regular use in clinics, spas, or studios.

Note: The cartridges are specifically designed for the NeedlingPen Aesthetic CONTROL or Infinity CONTROL and must only be used with the corresponding device to ensure safety and full functionality.

Nadelmodule
Aesthetic CONTROL

Nadelmodule
Infinity CONTROL

12-pin, 36-pin, and nano-pin cartridges for flexible, precise, and safe treatments.

Hydration

One Mask. Three Functions. Best Results.

Hydration Face Sheet Mask Essential Solution

Facial mask for intensive hydration, protective effects, and targeted skin regeneration.

- » Enhances the results of microneedling treatments
- » Reduces redness, irritation, micro-tears, and dryness
- » Supports the skin's natural collagen and elastin production

3-Level-Complex

Hydration, Protection, and
Regeneration.

Coco Cell

Carrier material made from
woven coconut milk.

Vegan

Contains no animal-de-
rived ingredients.

Cruelty-Free

We never test our pro-
ducts on animals.

Repair

Repair Balm Essential Solution

Anti-irritation SOS care balm that soothes, repairs, and protects the skin intensively.

- » Intensively nourishing, repairing, and restorative
- » Reduces skin irritations and redness
- » Decreases transepidermal water loss

UV Protect

UV Protect SPF50+ Essential Solution

Intensively UV-protective and repairing sunscreen for post-microneedling care.

- » High sun protection with SPF50+
- » Prevents unwanted side effects
- » Free of nanosized titanium dioxide and octocrylene

Daily Care

Enhancing Cream

Day Cream

Two-step day creams for post-microneedling care, including a spatula for mixing and application.

- » Base Cream + EFX Enhancer
- » Hygienic dosing with airless system
- » Reduces transepidermal water loss

SCAN ME

Anti-Aging Intense Enhancing Cream

Supports visible smoothing, regeneration,
and strengthening of aging skin.

Cellulite Enhancing Creme

Helps reduce cellulite, smooth the skin,
and activate metabolism.

Stretch & Scar Enhancing Cream

Promotes the reduction of scars, impro-
ves elasticity, and smooths the skin.

Skin Tone Control Enhancing Cream

Targets pigmentation spots for an even
complexion and brighter skin.

Dry Needling Serums.

Our microneedling after-care serums are highly concentrated treatments specifically designed for use after dry microneedling (Dry Needling).

All serums absorb quickly, leave a pleasant skin feel, and are particularly effective thanks to stable active ingredient complexes and patented hyaluronic technology. They nourish, revitalize, and protect the skin, improve elasticity and vitality, and create a visibly smooth, firm, and well-cared-for complexion—also ideal as a luxurious daily care.

Hyaluron Serum Anti-Aging Solution

Hyaluronic care for targeted skin treatment from the age of 20.

Vitamin C Serum Anti-Aging Solution

Care with Vitamin C and hyaluronic acid for radiant skin from the age of 30.

Retinol Serum Anti-Aging Solution

Care with Retinol, hyaluronic acid, and Vitamin C for skin from the age of 40.

Matrixyl Serum Anti-Aging Solution

For all ages. Our most popular serum for lifting and collagen support.

Matrixneedling™

Treatment Sets by Indication.
